# IRIS gen2

## ABOUT IRIS

IRIS is a revolutionary multi-technology weapon tracking system that assists in the management and real-time location of firearms. IRIS enhances a user's tactical advantage without disrupting pre-existing routines and procedures.

## WHY CHOOSE IRIS

- Benefit from real-time insights recorded onto a Solid-State Memory and concurrent GNSS receiver. Allowing IRIS to create detailed event logs capturing data like; shots fired, location of shots fired, and direction of shots fired as a standard.
- With advanced features like automatic theft alert, Man-down detection and Panic button, adding unrivalled value by transforming the way VIP protection / Law Enforcement and Elite Military units manage their firearm inventory and personnel deployment.
- With an #IRIS geo-fence set, any firearms removed from an armoury will not only trigger an alert but will cause locational tracking insights to be transmitted in real-time.

## WHAT DOES IRIS OFFER

SHOTS  
FIRED

AUTOMATIC

# SIZE MATTERS

WHATEVER THE SIZE OF YOUR WEAPON, #IRIS HAS A MODEL THAT FITS PERFECTLY.

## IRIS

SECOND GENERATION

### MOUNTING BRACKETS

- Cast Aluminium Side Clamps
- A2-70 Stainless Steel with Matte Black Finish
- Security Screws
- Available for all mainstream Handguns

### BUTTON

- Ambidextrous
- Synthetic Silicone Rubber
- Easy Grip Technology
- Unique wide-angle actuation

• AVAILABLE IN DIFFERENT COLOURS •

### TACTICAL FLASH LIGHT

- Corning Gorilla Glass Protection Lens
- Reflection (TIR) UV Stabilised Polycarbonate
- Cree High Bright LED
- Three(3) Unique Modes, Spotlight, Strobe, Hybrid

### BODY

- Glass filled nylon polymer
- IP67 Environmental Rating
- Various Colours Available
- Seal Leak Technology
- 100g AUW

### SERIAL NUMBER PLATE

- Stainless Steel 304 Material
- Laser Engraved Inscription
- IRIS UID Serial Number
- IRIS Device Model

# SECURITY WATCH

A cutting-edge solution for monitoring security personnel or key individuals in real-time. Designed for high data output without compromising battery usage, allowing the SecurityWatch extended use over long periods of time. 3Dimensional location technologies offer information on movement in terms of position, direction and speed.

Monitor routes and movement with locational insights. Pre-program routes into the watch and notify the user and supervisor when these routes are not followed or completed in a timely manner.

Alerts include both SOS Panic Alert which transmits a distress signal when the device is tapped three times. Automatic man-down detection will notify you if the wearer has fallen and may be in distress.

Geo-fencing can be looked upon as a virtual perimeter that you can draw around any location on a map. You will receive notifications if the wearer enters or exits a specified area.

With the addition of a Bluetooth beacons, the smartwatch can automatically activate tracking when the Bluetooth beacon is no longer in range.

\*A streamlined version known as the Security Band is also available

\*Coming soon. Picture shown for illustration purposes only. Actual product may vary due to product enhancement.

# EITAN

## SMART GRENADE

A strong and undefeatable electronic grenade that will disorientate with light and sound. An all-in-one reusable smart grenade that has rechargeable batteries and teargas canisters that can easily be replaced.

- **NON-LETHAL**

- **RECHARGEABLE**

- **REUSABLE**

\*Coming soon. Picture shown for illustration purposes only.  
Actual product may vary due to product enhancement

# ASTREA

## SMART SHOOTING RANGE

A smart portable shooting range that can monitor hits on target for up to 8 targets. A super sensitive vibration sensor placed down range monitors impact and displays hits digitally on the provided screen. All accessories come in a robust case for easy mobility. Extra features available when used with Ares.

- **REAL TIME SHOT RECOGNITION**

- **HISTORY OVERVIEW**

- **SHOT TIMER**

\*Coming soon. Picture shown for illustration purposes only.  
Actual product may vary due to product enhancement

# ARES

## BLE TRAINER

A smart multi-technology firearm accessory that assists with training insights, advice and alerts if your firearm is removed from your safe or home.

### TRAINING INSIGHTS

When ARES is attached to a firearm it will monitor gun recoil and provide trigger and shot timing analysis. Receive tips on enhancing trigger control and improving accuracy, securely transmitted via Bluetooth only to your choice of phone, tablet or laptop. Benefit from advice on grip changes, site alignment and trigger pull from Israeli Special Forces Veterans.

- SHOTS FIRED

- THEFT ALERT

- LOCATIONAL INSIGHTS

- DIRECTION OF SHOTS FIRED

- PROFESSIONAL TIPS AND TRICKS

### REMOTE MONITORING

Using Bluetooth beacons in your home, create a secure geo-fence ensuring that you receive alerts if your firearm is removed from this virtual fence without permission.

\*Coming soon. Picture shown for illustration purposes only.  
Actual product may vary due to product enhancement

# SMART SECURITY SOLUTIONS

## ELLA

### HOME ALARM SYSTEM

A secure modular alarm system with wireless PIR sensors and a simple on/off keypad. A cost-effective solution for home security and ideal for temporary situations and additional security layers. Add-on smart vibration sensors for early tamper detection.

### THE SOLUTION

- Choose from kits with 4 – 6 wireless PIR sensors
- Secure Military Grade Security
- Modular nature allows for additional PIR and vibration sensors to be added
- Ask us about our custom designed smart PIR sensors that are always on
- Ideal for short term rentals where easy installation and removal are important

\*Coming soon. Picture shown for illustration purposes only. Actual product may vary due to product enhancement

## AETHER

### GLOBAL TRACKER

A robust and durable satellite tracker that acts like a guardian angel for specialised military units, snipers and law enforcement operators who require secure global satellite coverage.

The Aether Global Tracker deploys the latest technology to offer superior performance and unparalleled battery life.

# ANUBIS

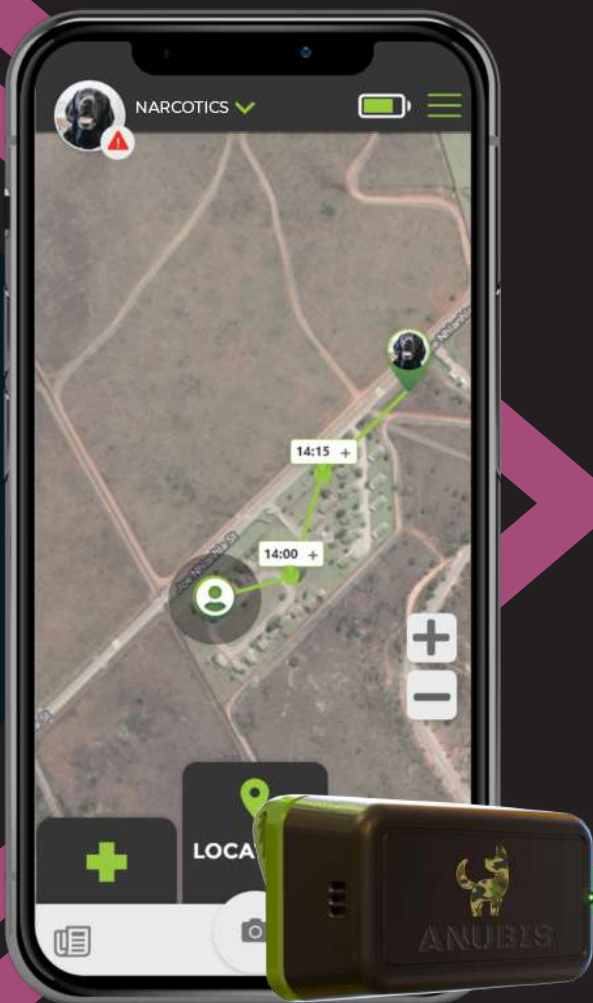

## CANINE TRACKER

### ANUBIS **K9** TRACKER

This Police Dog tracker is the ideal tactical accessory for dogs who answer the call of duty. These brave warriors are worth far more than their weight in gold and with the Anubis Dog Tracker they have met their match.

### ALWAYS ON GUARD

Anubis is the first tactical canine tracker that can keep up with law enforcement and service dogs. Anubis dynamically changes its programming and optimizes battery life according to the canine's activity level.

### ONLY THE BEST FOR LAW-ENFORCEMENT'S BEST FRIEND

Other canine tracking devices use an outdated GPS technology, Anubis utilizes a new technology called NeroGPS+, a low-power alternative that offers excellent reliability at a fraction of conventional GPS technology energy usage.

### NO **K9** LEFT BEHIND

If Anubis is no longer in the range of the preset safe zone, it will automatically activate and send a notification with location updates for up to 30 days.

\*Coming soon. Picture shown for illustration purposes only.  
Actual product may vary due to product enhancement

# THE CONNECTED CANINE

Plug and play dashboard: The Anubis application is a cross-platform web-based app that allows you to manage all your canine partners' activities in one place. With the three unique modes and quick access three-tab interface, all relevant information like a diet plan, vaccination schedule, activity log, and location make it easy to use

## WHAT DOES ANUBIS OFFER

- **BARK DETECTION**

- **NON-VOLATILE MEMORY**

- **IMU (ACCELEROMETER, MAGNETOMETER, GYROSCOPE)**

- **FIXED & ROAMING SAFE ZONES**

- **MULTI CONCURRENT GPS RECIEVER**

- **PEDOMETER (STEP COUNT, DISTANCE TRAVELLED)**

- **BETWEEN 3-6 MONTHS BATTERY CHARGES**

# SMART FARM

## A SMART FARM IS A **SECURE FARM**

Using modern information technologies farms can become both more secure and fully optimised. A smart farm benefits from controlled access, early warnings and remote monitoring.

### ACCESS CONTROL

Farms usually have a plethora of gates and entrances. With smart sensors that monitor if a gate is open or closed, for how long it was left open and when combined with an access control system it will even inform who opened which gate, at what time and for how long etc.

### SMART CCTV

Our smart CCTV range offers a complete solution with HD cameras, night vision and recordable hard drive. Each kit can connect to your mobile devices so you can view footage anywhere using a smartphone or tablet (iOS or Android) for ultimate peace of mind, home or away.

### PERIMETER PROTECTION

The problem with standard perimeter protection, is that intruders can get within close proximity of the homestead before there is any form of warning. With security systems moving into the digital age, they can now combine with wireless network equipment to make it possible to secure remote boundaries accurately and at an affordable cost.
